**SPECIFICATIONS**

(DIN 45 500)

**■ EQUALIZER SECTION**

Frequency response (center position) 15 Hz–20 kHz, –1 dB  
 Maximum output voltage 6 V  
 Rated output voltage 1 V  
 Rated total harmonic distortion (full scale input)

0.08% (1 kHz)

Input sensitivity 1 V  
 S/N (full scale input) 86 dB  
 Maximum input voltage 2.3 V (1 kHz)  
 Input impedance 47 kΩ  
 Gain 0±1 dB  
 Band level controls ±12 dB

## 3 element parametric equalizer

Center frequency  
 LOW 31.5, 40, 50, 63, 80,  
       100, 125, 160, 220 (Hz)

Key control –300~+300 cent  
 MIC1, MIC2 1.4 mV/4.7 kΩ  
 Mic echo 0.2–1.6 sec

**■ GENERAL**

Power consumption 17 W  
 Power supply  
   For (E) (EB) (EG) (GN) area AC 50/60 Hz, 230–240 V  
   For (GC) area AC 50/60 Hz, 110 V/127 V/220 V/240 V  
 Dimensions (W×H×D) 430×92×290 mm  
 Weight 3 kg

**Notes:**

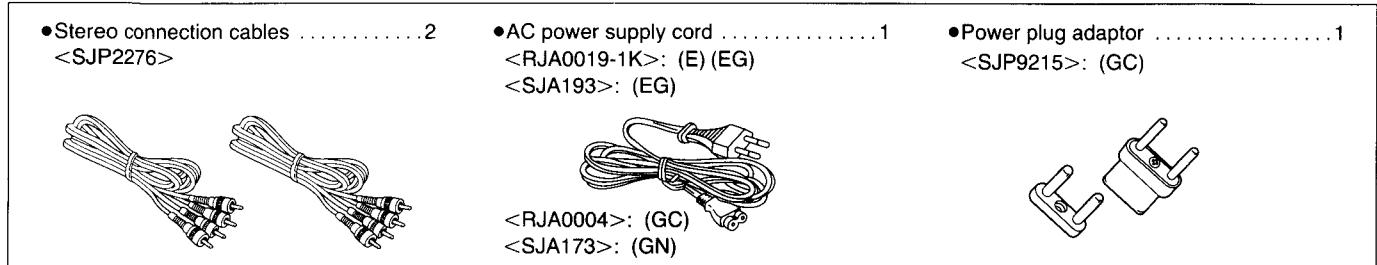

1. Specifications are subject to change without notice.  
    Weight and dimensions are approximate.
2. Total harmonic distortion is measured by the digital spectrum analyzer.

## ■ ACCESSORIES

**Note:** The configuration of the AC power supply cord differs according to area.

## ■ LOCATION OF CONTROLS

### Control section

#### ① Power "STANDBY ⏪/ON" switch (POWER ⏪ STANDBY ⏪ ON)

This switch switches ON and OFF the secondary circuit power only. The unit is in the "standby" condition when this switch is set to the STANDBY ⏪ position. Regardless of the switch setting, the primary circuit is always "live" as long as the power cord is connected to an electrical outlet.

**Note:**

For this unit, even if this switch is switched to the "STANDBY" position, there is still a slight power consumption of about 2.7 watts; this is in order to assure the retention of the "most recent" memory and the preset-memory functions.

**"Power-through" function**

Discs, radio broadcasts, etc. can be heard even if the power of this unit is switched to STANDBY.

Note, however, that the power plug should be left connected to the AC outlet.

#### ② Microphone volume controls (VOL1, VOL2)

#### ③ Voice mute button (VOICE MUTE)

This button is used to change "KARAOKE" (using microphone with an accompaniment).

#### ④ Key control button (KEY CON)

This button is used to adjust key level when performing "KARAOKE".

#### ⑤ Echo button (ECHO)

This button is used to adjust the reverberation sound when in performing "KARAOKE".

#### ⑥ Display section

#### ⑦ Memory button (MEMO)

This button is used to store an original equalization curve or simulated listening environments.

#### ⑧ User mode select button (USER MODE)

This button is used to select the user mode of equalization curve or simulated listening environments.

#### ⑨ Fixed mode select button (FIXED MODE)

This button is used to select the fixed mode of equalization curve or simulated listening environments.

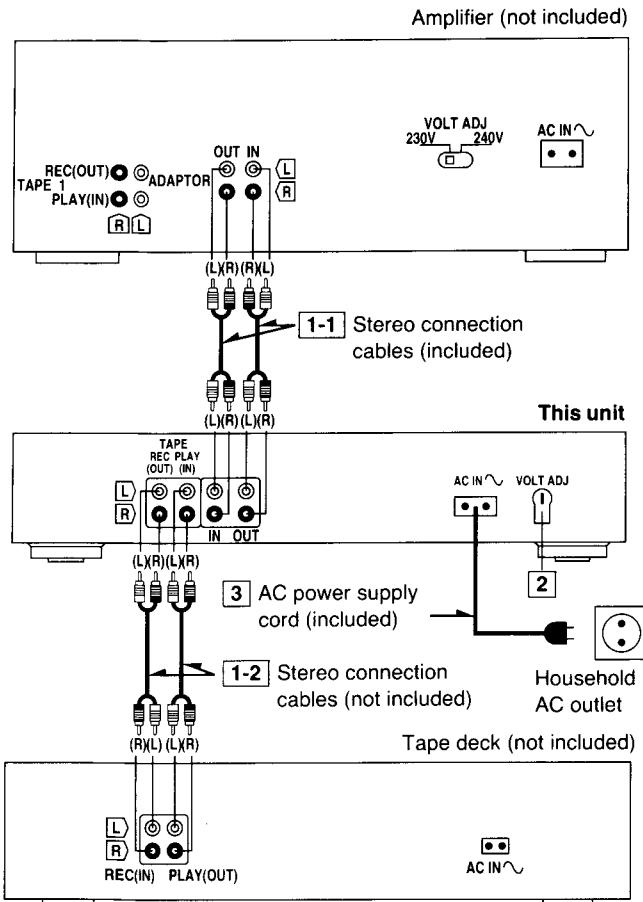

#### ⑩ Equalizer frequency indicator (EQ FREQ)

#### ⑪ Effect/key control indicator (EFFECT/KEY)

## ■ CONNECTIONS

Make connections in the numbered sequence by using the included cables.

The illustration below shows an example of connections made when this unit is combined with a Technics electronic component system, and shows only the connections to be made to and from this unit in that combination.

### 1 Connect the stereo connection cables.

#### Stereo connection cable

### 1-1 Connect the stereo connection cables (included).

When you have an amplifier which has the terminals for external units (ADAPTOR/GRAFIC EQ/EXT), connect this unit to those terminals.

When you have an amplifier which has no terminals for external units, connect this unit to the TAPE MONITOR terminal.

### 1-2 Connect the stereo connection cables (not included).

### 2 Setting the voltage selector (VOLT ADJ)

(For areas except continental Europe, United Kingdom and Australia)

Set the voltage selector to the voltage setting for the area in which the unit will be used.

[Use a minus (-) screwdriver]

• Note that this unit will be seriously damaged if this setting is not made correctly. (There is no voltage selector for some countries; the correct voltage is already set.)

• If the power supply in your area is 117 V or 120 V, set to the "127 V" position.

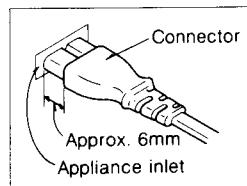

### 3 Connect the AC power supply cord.

Connect the AC power supply cord (included) after all other cables and cords are connected.

#### For Continental Europe and United Kingdom

##### Insertion of Connector

Even when the connector is perfectly inserted, depending on the type of inlet used, the front part of the connector may jut out as shown in the drawing.

However there is no problem using the unit.

##### Note:

The configuration of AC power supply cord differs according to area.

#### For United Kingdom

Household AC outlet

Fit a suitable plug to the AC power supply cord.

#### For areas except continental Europe, United Kingdom and Australia

If the power plug will not fit your Household AC outlet, use the power plug adaptor (included).

**(12) Echo indicator (ECHO)**

**(13) Sound effect level control (JOG)**

This control is used for adjusting the level of simulated listening environments effect, equalization level and specific frequency shift.

**(14) Jog mode button (JOG MODE)**

This button is used to control the equalizer frequency, the reverberation sound (effect), the key in the "KARAOKE" mode and the reverberation sound (echo) in the "KARAOKE" mode.

**(15) Microphone jacks (MIC1, MIC2)**

**(16) Display mode select button (DISPLAY, -SPECTRUM -MODE)**

This button is used to select one of three spectrum curves. If you press and hold this button, the display mode will change.

**(17) SFP OFF/ON button (SFP, OFF/ON)**

This button is used to activate Sound Field Processor.

**(18) Demonstration button (DEMO)**

This button is used to change sound effects sequentially.

**(19) Equalizer ON/FLAT button (EQ, ON/FLAT)**

This button is used to switch the equalizer on or flat.

**(20) Equalizer frequency select buttons ( $\downarrow$  BAND  $\uparrow$ )**

These buttons are used to select the equalization frequency.

**(21) Equalizer level-control buttons (- LEVEL +)**

These buttons are used to adjust of equalization level.

**(22) Slope (Q) select button [SLOPE (Q)]**

**(23) Source indicator**

Press the input selector to select "SOURCE", and the source indicator will illuminate to RED.

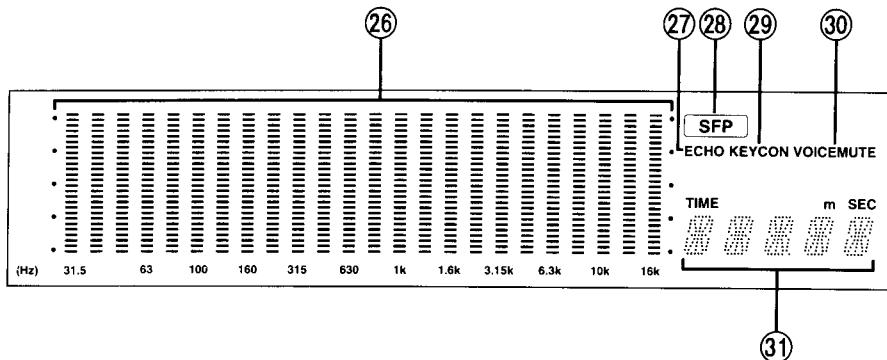

**(24) Input selector button (INPUT, SOURCE TAPE)**

**SOURCE:** Set to this position to listen to the radio or a compact disc, etc.

**TAPE:** Set to this position to listen to a tape deck connected to the back of this unit.

**(25) Tape indicator**

Press the input selector to select "TAPE", and the tape indicator will illuminate to YELLOW.

### Display section

**(26) Multi level display**

This display shows the equalization/spectrum analysis level.

**(27) Echo indicator (ECHO)**

**(28) SFP indicator (SFP)**

This indicator illuminate to activate simulated listening environments.

**(29) Key control indicator (KEY CON)**

**(30) Voice mute indicator (VOICE MUTE)**

This indicator illuminates to activate "KARAOKE" function.

**(31) Sound effect display**

This display shows the mode of equalization curve or simulated listening environments , or delay time, etc.

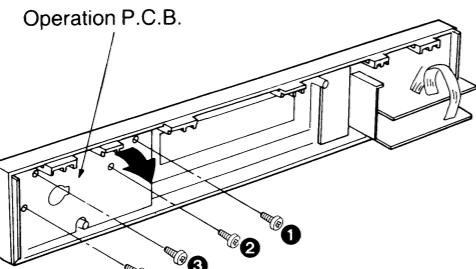

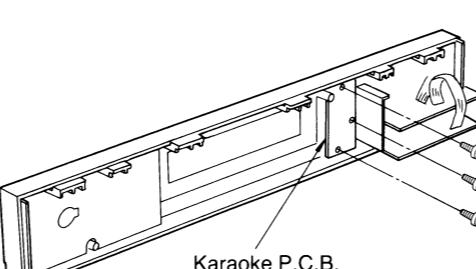

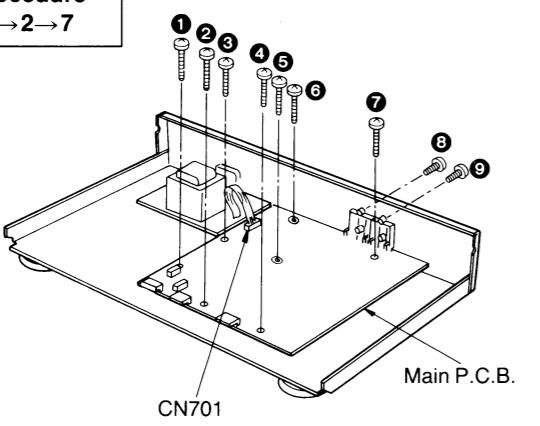

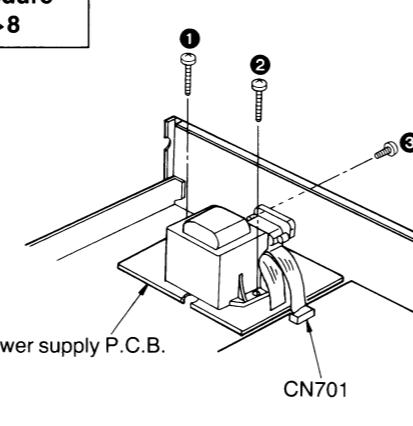

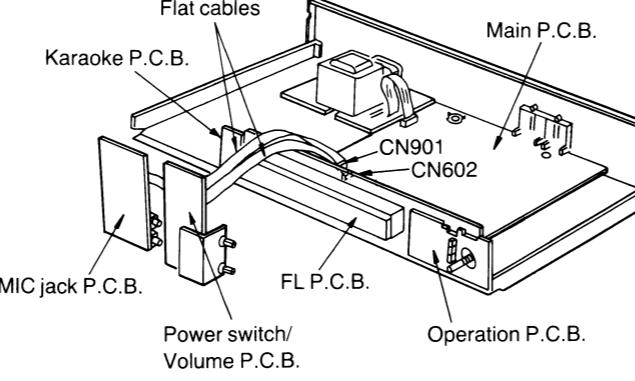

## ■ DISASSEMBLY INSTRUCTIONS

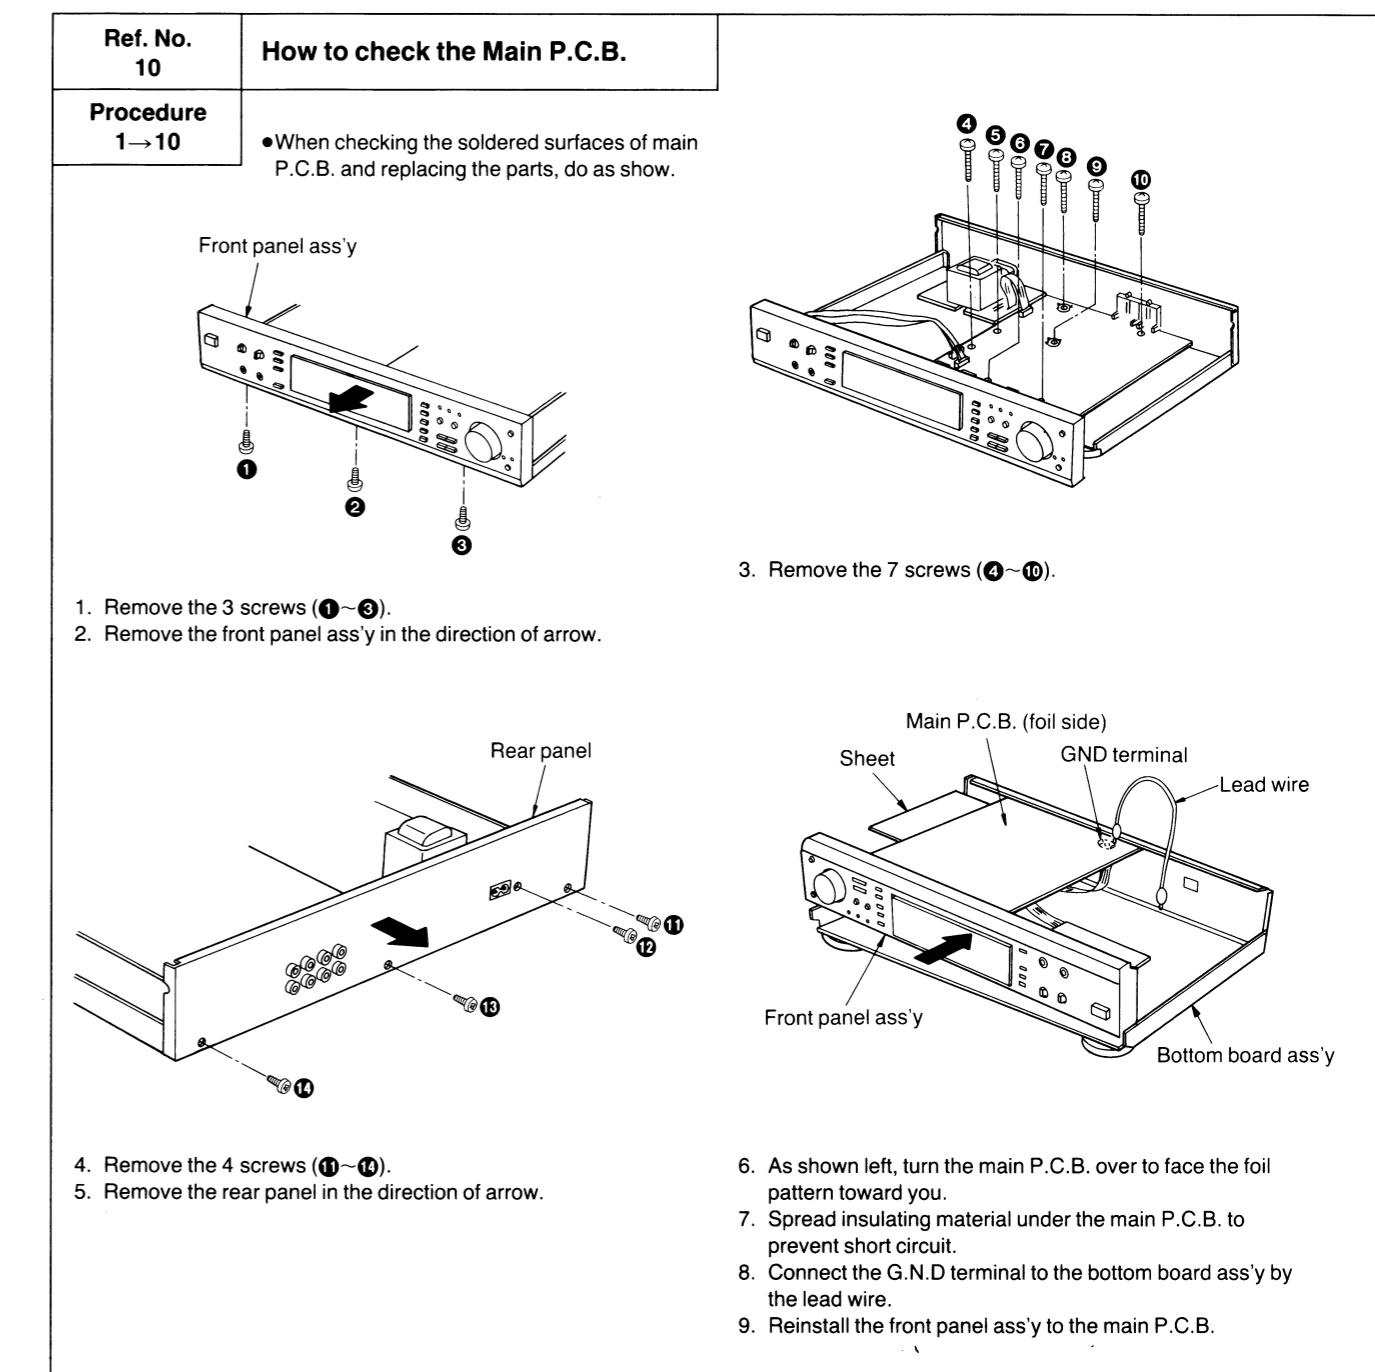

### "ATTENTION SERVICER"

Some chassis components may have sharp edges. Be careful when disassembling and servicing.

### ● Replacement of the Foot

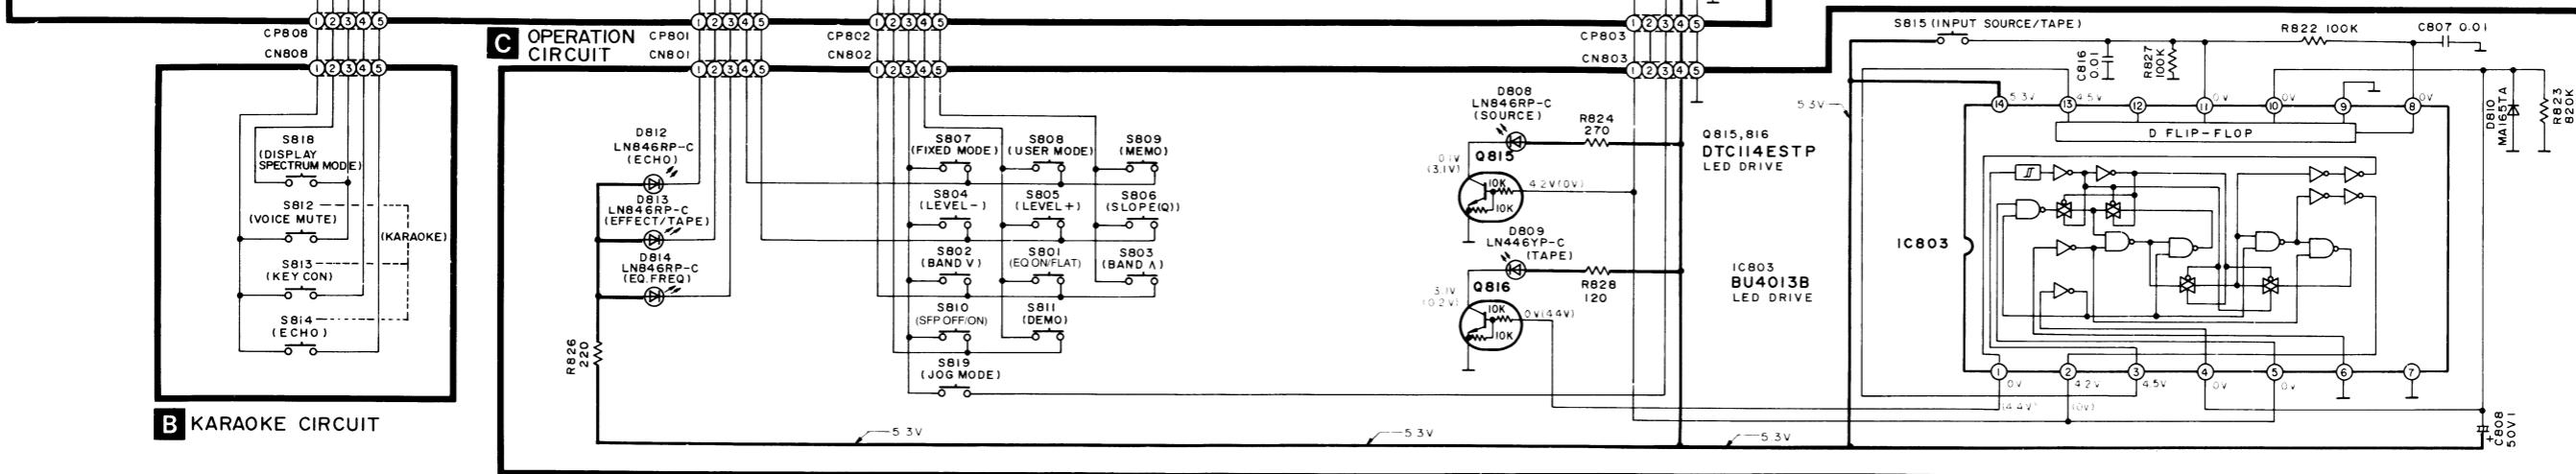

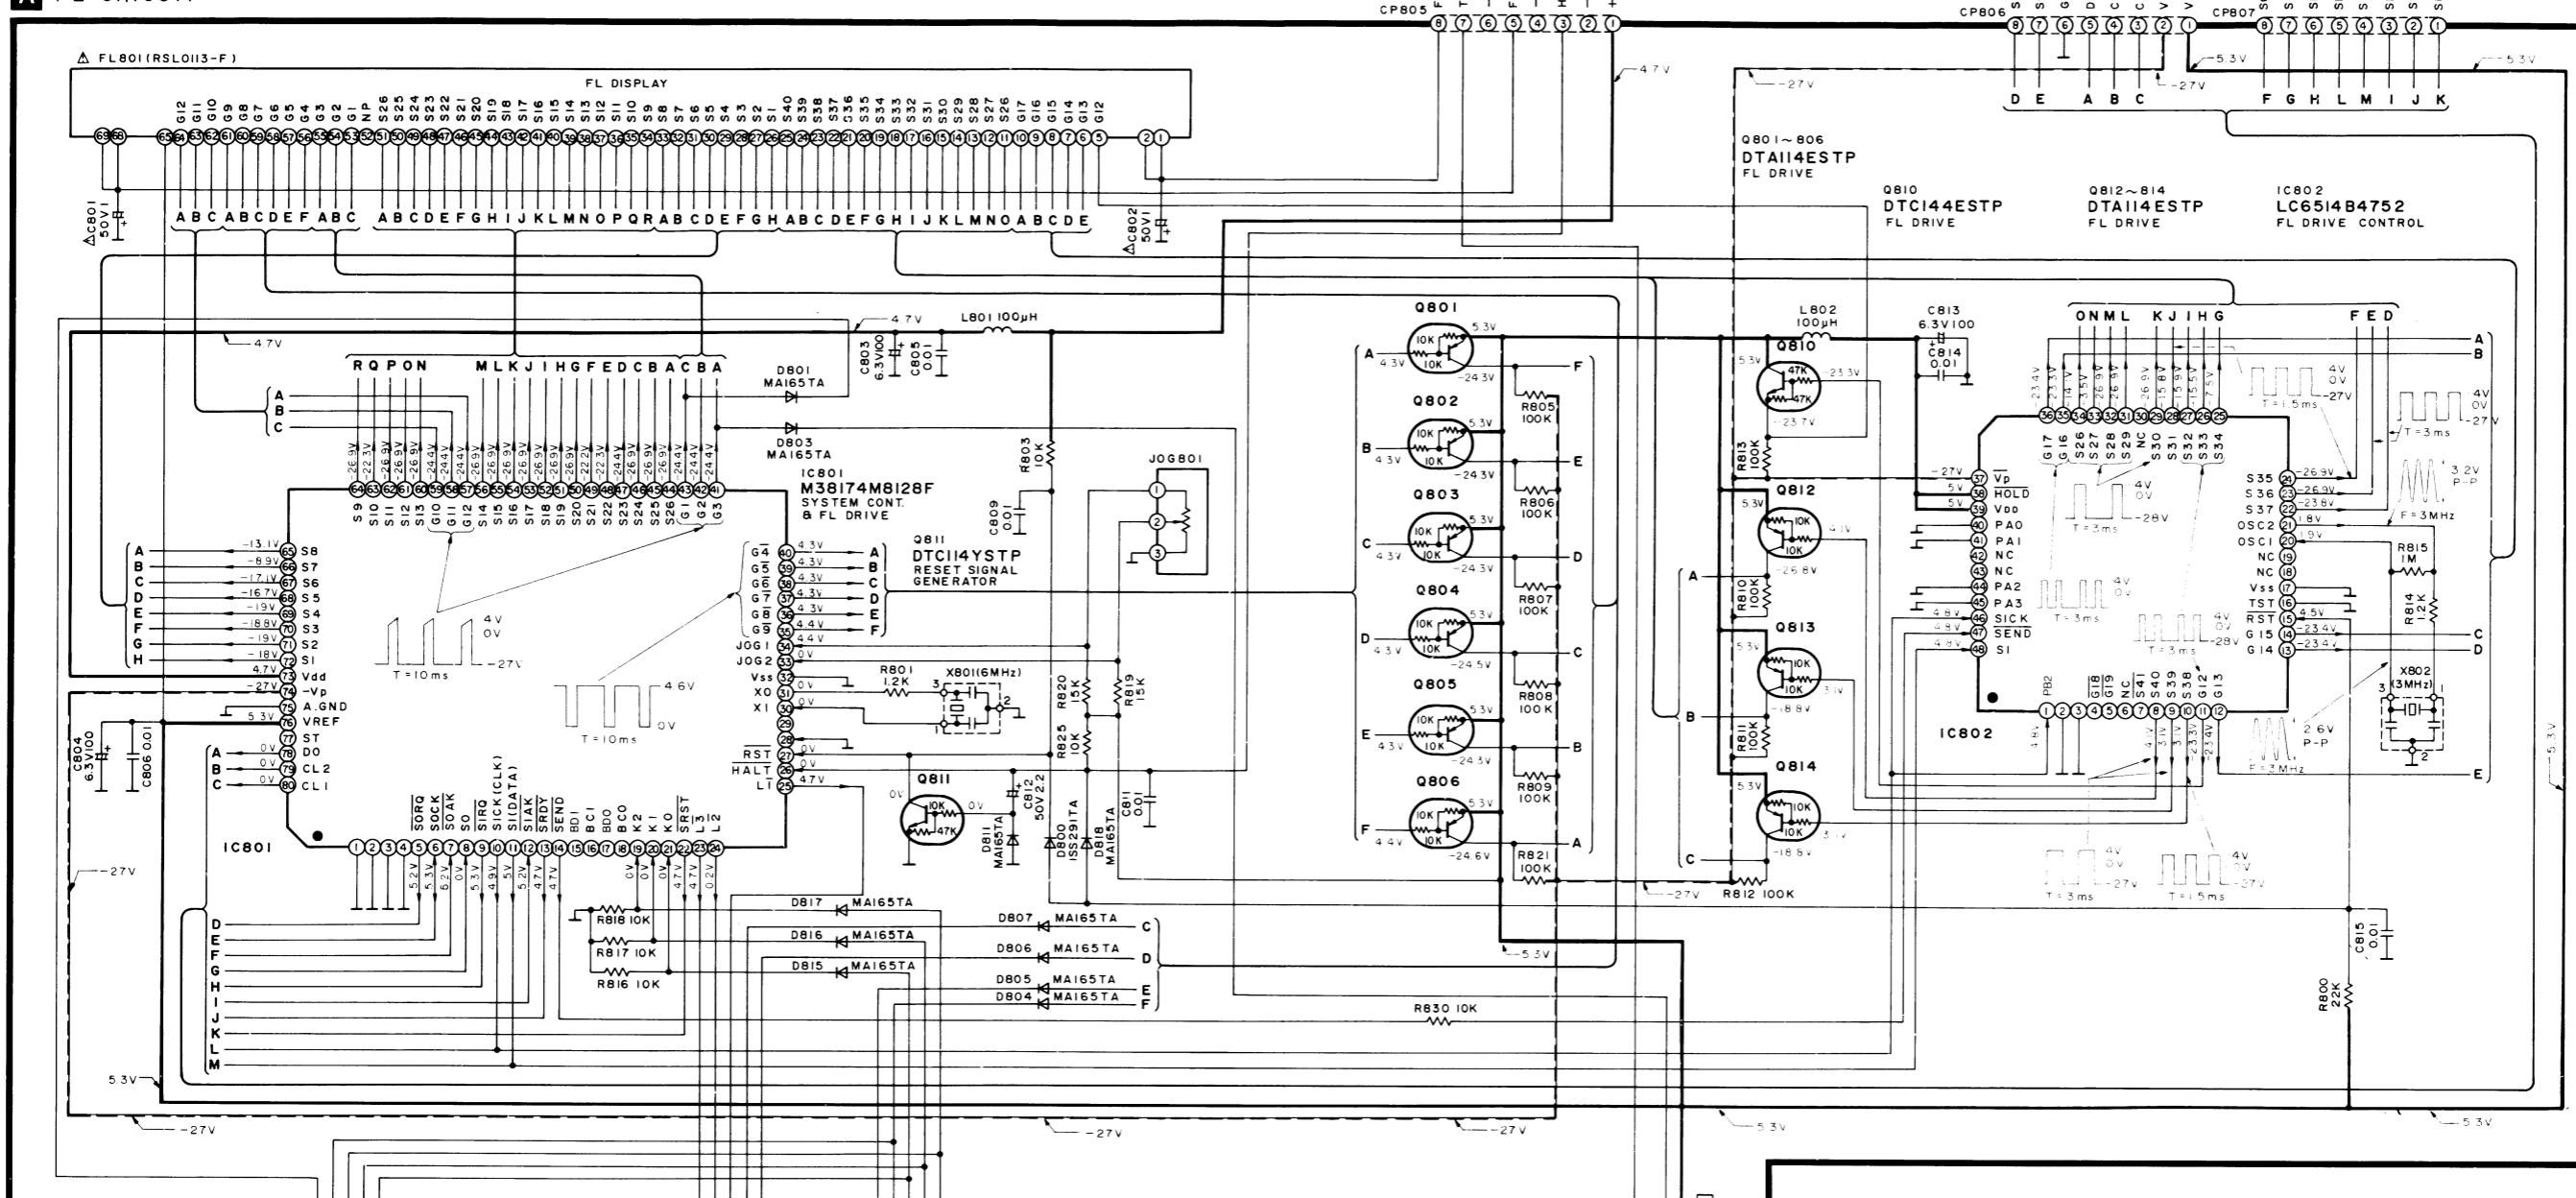

1. Remove the 4 heat melted posts on the Bottom Board with a pair of nippers or similar tool.
2. To replace the foot (RKA0053-A) on the Bottom Board, melt the 4 posts with soldering iron.
